Airport Tree Removal Project

- Trees scheduled for removal north of the runway within the airfield perimeter beginning as soon as the end of next week. Notice will go out to community neighbors tomorrow.

Airline Schedule Update

- Refer to attached handout – flight schedules have adjusted slightly since summertime.

PWM Noise Statistics – Jennifer Dunfee

- Reviewed PWM Noise Statistics year to date for 2013 (see attached presentation).
- The Operations vs. Passengers slide demonstrates continued improvement. The fleet mix is generally operating with fewer flights carrying more passengers on larger aircraft and has decreased by almost 50% since 2001.
- Reports vs Reporters slide demonstrates the seasonality of the airport’s operations and thus noise impact on the community.
- Statistical analysis capability is limited due to the Jetport’s losing its contracted service provider. While we are working with a few replacement companies, a contract has not yet been negotiated. The goal is to have data for the summer months.

Current Airfield Conditions & Weather Reporting

- ATIS Broadcast – 207-775-1039 – Hourly METAR
